
eShop template - Need option for 100% width

Posted by ppendleton - 2008/11/30 11:57

I am using the eShop template (quickstart package).

I need to adjust the site to be auto width or 100% of the viewing screen.

The site is: <http://www.ConstructionOfficeOnline.com>

Please PM me with any questions, price, and any other info.

Thanks,
Peter
