## Managing Users (email addresses)

Posted by BillyC - 2008/12/05 02:26

---

When registering a new user and the email address is the same as an existing user, the system won't accept it. Says already a user with the same email addy.

Is there a way to change this as some families only have one email address

I want to do this because different newsletters go to different users depending on their requirements

This isn't a newsletter reistration problem but a Joomla user problem

Any ideas?

Thanks

Hello BillyC,

The Joomla system is one email just for one account. and it's a default system from Joomla

Thanks ronysyz

That sucks!!
