## Auto open option errors

Posted by Stefan Molleman - 2008/08/25 15:00

---

Hi just installed the mod.

Seems asthough all the auto open options don't work. I have disabled the auto open function but it still opens on every reload.

My site is <http://www.ladybingo.nl>

Also tried to search the forum with this error but no solution has been given thus this new thread.

Regards

Stefan

Just delete the message above, I have uninstalled the mod due to the conflicts with other flash modules on my website

Hope to get it working someday

Ich habe das gleiche Problem.:(

Wie kann mann AutoOpen deaktivieren?
