
Can't use 2 Jootabs module in 1 page

Posted by wit - 2008/05/23 23:31

I can't use 2 Jootabs module in one page?
is it normal?

here's the dummy

Hello wit,
we are sorry, until this time JooTabs just available for single. It will not be work properly if you use 2 JooTabs in 1 page

Regards
Rony

I want to use 2 templates for one site

Posted by shakirk - 2008/05/27 23:36

I want to use 2 templates for one site with the same users. Suppose if some user logged to the site (default template - communa2) that means he (she) automatically logged to the video part of the site (video piazza template). Any instruction on that?

Hello Sean,
Welcome and thanks for joining

I'm sorry, you have posted at the wrong sub forum,
please read our rules first, and then try to always search about your trouble (I ever support and finished about your trouble before).

If you still need more support, please post your trouble on the correct forum.

P.S.
Please don't make any discussion about Sean's trouble here, and hope sean make a new thread about him trouble on Template Support Forum
