## Display Online User

Posted by kalabaka - 2008/04/12 05:13

---

Hello..We are using CB Superthumb and the function Display Online User.But the avatars from all users those who are online are not being shown and all users also.WHY?please answer to me if you know something. Thanks a lot!!

Hello Kalabaka,  
did you install community builder? and would you like to share your paramaters, please

Regards  
Rony

---

Hello Kalabaka,  
it's not easy for me if you don't share your parameters, and more easy if you share your live site url, please

Regards  
Rony

ok Rony thank's. I sent you an image with the parameters. As for the url even if I give it to you it is not working anyway...  
<http://img122.imageshack.us/img122/299/cbparametersxu8.jpg>

P.S. Is it possible that CB\_superthumb works works only on "templateplazza" templates?

---

Hello Kalabaka,  
According your parameters, that will display your user (member with picture or not) when they are using their account or logged condition.

Is it possible that CB\_superthumb works works only on "templateplazza" templates?  
as i know, it should be able for another template, except your template have any trouble.

What about if you share your live site url?

Regards  
Rony

---

I am also getting the "no online user" error. However, the other functions all work.

I have newest CB installed as well as newest CB Thumbs. The params look to be correct. Is there something specific that causes this issue for me to look at?

---

## Re:Display Online User

Posted by theriault5149 - 2008/04/18 18:07

---

Sorry.. I was trying to attach the images of the front page and the params that I am using.

Here they are:

<http://www.templateplazza.com/images/fbfiles/files/params.zip>

---

Hello Chad,  
what about if you change these parameters become to:

See Users Without Picture : Yes (Show Users Without Picture)

Regards  
Rony

---

If it's working on your other joomla site, so it should be working too on your joomla site now.

maybe any lost or false with your joomla site, please check its, but i'm not sure, because you ever try that in other joomla site and it's success. so the trouble is not from that module.

hope you understand

Regards

---

Hi CAM\_1,

Like Rony said if it works in one site and the parameters are exactly (make sure of this) the same it should work as well in other site!

Can you provide more details?

Best Regards,

---

## Re:Display Online User

Posted by theriault5149 - 2008/04/30 21:00

---

Regardless of whether it works on one site and not the other - don't you think it is odd that it is saying that there are no users to show? Even when you are online and logged in yourself?

If there was no picture set, then it would just show the name. The really odd thing is that ONLY the who's online now option doesn't work. The other options (last logged in, random, etc) all work perfectly.

Is there anything else I can send you to get a better picture of this?

Thanks

Chad

You have to install CB, then login in backend Joomla! and go to modules---> CB Supertumb

Setting:

Display Only Online uSER

I have the same problem super thumb does not display online users.

I registered on the comuna1 demo on templateplazza site, after login superthumb on demo site says no users online while the who's online module reports correctly.

Seems there is something wrong with this module.

Hi all!

I have solved the problem with a small change in file mod\_cb\_superthumb.php

Change this code:

case 9 :

```
$sql = "select u.id, u.username, u.name, c.avatar FROM #__users u, #__comprofiler c, #__comprofiler_members a, #__session AS s WHERE u.id = c.user_id $imagenot $avatarplease and c.user_id = a.memberid and u.username = s.username and c.approved = 1 and u.block = 0 and c.confirmed = 1 and c.banned = 0 group by u.id limit " . $count; break;
```

In this:

case 9 :

```
$sql = "select u.id, u.username, u.name, c.avatar FROM #__users u, #__comprofiler c, #__session AS s WHERE u.id =
```

---

c.user\_id \$imagenot \$avatarplease and u.username = s.username and c.approved = 1 and u.block = 0 and c.confirmed = 1 and c.banned = 0 group by u.id limit " . \$count;  
break;

---

## Re:Display Online User

Posted by franck - 2010/02/17 09:26

firstly,

i cannot find the "script" you describe in my mod\_cb\_superthumb.php where i can find it ?

secondly,

in usermanagement in CB, the button "save" when i would want to approve any user doesn't work, in other tabs, the button "save" work properly

maybe you use the latest version

my tricks above for oldest version (more than 1 year ago)

I've paid for being member and hope that buggs could be repaired.

In fact, does anybody can solve those two problems ?

save button doesn't work fine and "online users" doesn't show anybody !

it's not very efficient as a community portal in that particular case.

please send me good script to turn my site into a working site.

thank's for your involvement.

best regards.
