---

Hello,  
How do you remove the Moopopup logo in the header of the box?

I second this. I love the module but can't have this be one of the first things my visitors see. I would gladly give credit somewhere else, but quite frankly... this makes the module unusable for me. Bummer!

Look in the images folder under the moopopup folder. Just modify the the bg\_head image.

hi,  
I tried editing all the bg\_head and UL them but it never made a difference. I did a hard refresh. Im happy to leave it there if i cant get rid of it as it is an awesome module!

Regards  
James

erase the logo from the "bg\_head.png" (or which ever image corresponds to the color scheme you're using, look at the # in the name of the files "bg\_head#.png").
