
[Closed] Xtypo images not appearing

Posted by Shawn Van Daele - 2007/04/09 19:54

Hello, have implemented Xtypo - it's an awesome bot and very easy to use. However, I've found that the images are disappearing after you navigate away from the content page after viewing for the first time. When you save the content and view the page they appear fine. Move to another section of the site and return to that page - no images. The rest of the styling is fine - alignment, colours, borders, etc...just no images.

I am also using Light Thumb on my images...could that be part of the reason?

S

I'm having the same problem as Shawn, but I'm not seeing the icons at all. The rest of the bot works fine.

Bill

Try with Firefox or another browser

I have problem so with Firefox or IE6 OK

h**p://img360.imageshack.us/img360/6588/ffst0.jpg

And with IE7

h**p://img390.imageshack.us/img390/7967/ie7ui2.jpg

I does understand any! but the demonstration page is OK :S :huh:

I was having trouble with the icons not showing. By trial and error, I found out there was a conflict with OpenSEF. When I turned that feature off, the icons appeared.

I don't believe I have OpenSEF enabled on my site...how can I tell? If I do, how can I disable it? (sorry, quasi-newbie

here!)

Hi Folks,

I have the same problem! With FF its working fine, but in IE7 the centered xtypo dont show the " marks!!

The left aligned box is working flawlessly...

:blink:

Anyway this is an absolutely superb mambot! thanks for the creators! ;)

Are you setup everything correctly?

Live site url?

Regards!

This is exactly what I'm getting also but only with IE7

FF = OK

Opera = OK

IE6 = OK

Any ideas?

Are you positive that the texts on between {xtypo_whatever}...{/xtypo_whatever} there's no HTML tag on it?

Re:Xtypo images not appearing

Posted by Joshua Sprague - 2007/10/02 20:56

Yes on one of them I actually just used the demo text from the mambot. {xtypo_info} this is xtypo info {/xtypo_info}

Strange that IE6 works

Thanks

If you copy pasted from the information in the mambot try to remove the Bold formating from the {xtypo_...}{/xtypo_...}

Sorry,
Athos,

Did you have a problem where we can help!

Regards,
