
IE 7 PagePeel - no flash installed

Posted by Gast - 2007/12/22 18:47

PagePeel lief zuerst bei beiden Browsern Mozilla und IE7 Problemlos.
Mit Mozilla Firefox gibt es immer noch keine Probleme!

Seit ein paar Tagen hat sich einfach der IE7 damit verabschiedet.
Im IE7 bekomme ich nur noch rechts oben im Eck folgender, schwarzer Text angezeigt.
no flash installed

An den nötigen Plugins/Addons kann nicht liegen. Andere Flashfilme und Dateien werden mir Problemlos mit dem IE 7 angezeigt.

Nur mit dem PagePeel gibt es das kleine Problem.:unsure:

Hat das noch einer und kennt hier vielleicht eine Lösung?

Hi Gast
i can't hear you...
next time, would you like to speaking english, please?

i guess that you've any problem with PagePeel banner and flash installed. Please you going to install this software, so your problem will solved
i hope you can hear me

Regards
Rony

Hallo Rony,
ich kann kein English. Nur etwas gebrochen. Übersetze mit einige Texte mit Google-Translate.

No speak english.

This Text translated Google:
PagePeel ran first in both browsers Mozilla and IE7 problems.
With Firefox, there is still no problems!
Since a few days ago, just so that the IE7.
In IE7, I just get right up in the following corner, black text.
No Flash installed
At the necessary plugins / addons can not lie. Other Flash movies and files me problems with the IE 7.
Only with the Page Peel, there is the small problem.
Did even one here knows and perhaps a solution?

Wäre schön wenn die Kommunikation klappen würde.

Gruß Michael

I'm having the same exact problem. I have uninstalled and reinstalled Flash. Earlier today Page Peel worked just fine in IE7 then this evening I get a message saying "No Flash Installed". It still works in Firefox. I even uninstalled and reinstalled Page Peel, still same issue.

Any ideas on how to fix this?

Sorry, I'm not sure what you mean? Can you explain in a little more detail?

Thanks!
