## problem with display in IE7

Posted by profwalken - 2007/12/29 00:06

---

sorry for my english i'm french.

I've installed xtypo v1.2 , it work's fine in FF but in ie7 there's a bug, it display only a part of the item.

I don't know what to do to solve this problem.

you can see the problem here:

<http://www.asvg.org/site>

thank's a lot for help.

Profwalken

Hi profwalken,

thanks for sharing with us.

for this case, please read and join with this thread ([click here](#))

Good Luck

---

thanks RonySYZ,

i have read the post before you link it for me , but there's no solution in it. Just the list of installed modules .

Do you want i include my new post in this one?

we have the same problem with IE that's sure but is it easy to follow the problem if i add my post in the same thread.

---

thanks profwalken, if you've read that thread, i hope you will join with that thread.

but there's no solution in it

yes, until now, we doesn't any solution.

i hope that you understands

---

ok

so if i well understand , you just have to merge my post with this thread you linked to me. i'm right?

For a solution is there any hope with a end date ?

Thank's a lot

---

Best wishes for the new 2008 year .

I too have problems with this mambot in IE7, it does not behave as FF. For example at crossman.co.nz the initial statement is supposed to have large quotes around it, which are nicely visable in FF. This is a fantastic tool if it was cross browser compatible. This text is sitting within a modules text area rather than a content item if this is of any help ?

Nick

p.s. I have tried this within a conventional article and it does not work either.

I have fixed it !, reading other posts about missing images, which is what my quotes were, I went back and removed the bold from the tags (which were there from the mambot instructions) and it worked - yes ! Can i reccommend that the mambot instruction DO NOT include bold tags as this affects IE7 when you copy and paste (as you are inclined to do). This is now a fantastic add-on to Joomla
