
introtex not showing

Posted by andrew - 2008/04/14 21:25

do u have to use introtex to display articles in MFP?

If I do not use the read more button, my article won't show in MFP. IS ther a way around this?

Hello Andrew,
First, please make sure your Section(s) ID and Category(s) ID are correct
Second, please make sure your Periode Novelty is correct
and save its

Regards
Rony

period of novelty is 1200 days and sec and cat ids are correct. Title is there and the image is there, just not the intro text unless I use the read more button.

Yes or no?

"do u have to use introtex to display articles in MFP?"

Hello Andrew,
i think that you must check your articles and share your live site url and your parameters for this module too

"do u have to use introtex to display articles in MFP?":silly:

hahaha..., of course guy, if you see our demo, we use its, like for Times Plaza demo, Bulletin Plaza Demo and so many demo, It's working properly.

I think that maybe you just join with us, and use our quickstart;)

regards
Rony

SO YES, I HAVE TO USE THE READ MORE BUTTON (intro text) WITHIN AN ARTICLE TO HAVE TEXT SHOW UP ON IN THE MFP?

What if I do not want to use intro text and want use character count to limit the amount of text displayed?

I'm not sure if you understand me. I'll try and make this as clear as possible.

If I do not use intro text/the read more button no content shows in the MFP. IS that a normal function of your module?
