## Submit News to Multiple Categories from front page

Posted by ColinT - 2008/04/22 04:25

---

Good day, TPer... Could someone give me some hints on how I might be able to get a front end publisher to be able to submit to another category besides Latest News? One that's using the Mini Front Page mod. For example, I want to be able to publish from the front page into the module position 5 in the Bulletin TP which is using a mini front page mod.

For some reason I'm only able to select "Latest News" in the Category drop down.

Thanks You!

hi colin,

did you already set on the user manager access level? it is on your joomla backend. from there, you can manage user (on certain level, eg. author, publisher etc) and what this level can do with content (read, write, publish etc) .... so with this management, you can access from front-end with its level access permission ...

hope this help ...

regards
