
KWICK not installing

Posted by RainbowJammer - 2008/04/22 16:14

I have installed the module on my DEV machine and done all my graphics and I am so pleased with it, however, just tried to install the module to my live site and get the following error:

Fatal error: Call to a member function getTagName() on a non-object in
/home/bigbubbl/public_html/administrator/components/com_installer/installer.class.php on line 167

Anyone with any ideas?

Many Thanks

Hello Rainbow,

This trouble maybe become from your server.

Please check your server, is it Joomla Friendly or no?

please check first, before you use Joomla for your server

Regards

Rony

Sorted, my zip archive was corrupt, I re-downloaded from your site and it installed OK.

:P
