Joomla! 1.0.15 Stable, Lamp

Custom extension for community builder profile that allows much greater profiling options. many more hacks and mods!

Its a Social networking resource center for joomla but its also a social networking site in its own right. We aim to improve joomla as a platform for creating social networking sites. Hopfully there will be some custom development in the future but right now we just trying to get the site up and running and hopefully recruit a team.

If you want to join a community that aims to improve joomla as a basis for social networking then please sign up!

what do you think?

Finally MG,

Finally i found someone who cares about that as well as me! Goodest job is with profile designs. I will also share very soon some of that designs!

Good luck and congrats!

Regards,
