## What are we supposed to do after 6 months?

Posted by jst - 2008/04/15 15:45

---

If we download and use a template - can we continue to use it after 6 months if we do not continue our membership?

Hi there,

Yes you still can use the template even after your membership is expired. That's the good part, isn't it?

Any more questions? Just ask will you.  
:)

you said already but i want to know exactly :)

now. the usage of templates is not depend of membership.  
am i right?

so, if our membership expire and we dont renew it, we can still use templates that downloaded in membership time?

Please say yes :)

Because i am a student in Türkiye and my economical situation dont allow extra buys :)  
but i think at least buy 6 months membership.

And my last question.

One membership = one template

or

One membership = all available templates. ???

Thank you very much

Hello, Cheliksel

you can use all templates which are available to you for download during your membership period of 6 months

but you can use those templates only on 2 domains (2 domains licence comes with 35\$ - 6 month membership)

if you want to use them on 3,4,5 or more domains than you should buy membership which allows you that

and offcourse, when your membership expires you are still legal to use all templates which you downloaded during membership period and it is legal while you use them on max. 2 domains

that's the point :)

thank you very much.  
so am i understand. ( about 2 domain.)

if i remove all script that installed domains and can i use new domain.

for example.

i install on 2 domains.

and i need extra buy for install new domain but if i remove one of this domains installed script, i can install new domain.

Only 2 domain limitation.

Am i right? :)

and thanks so much again
