
Show only a ItemID

Posted by Gamon - 2008/05/06 06:29

Hi,
I need to show only a specific ItemId of a category.

I Have:
section Id 1
category ID 2

in category Id2 there are 4 items

I need to show only 1 item id of category Id2

It' possibile?

Thank you
Gamon

Hello Gamon,
as default, it's not possible,
but you able to custom several code

Hi,
Any suggest to custom the code?

Or I can wait the next release with this feature?

Thank
Gamon

Ok RonySYZ,
I solved. I made more categories and put it 1 item.

thank you

Congrats Gamon,
we are happy about your success

Regards

This is what I need to do, without creating new categories.

I'd like to use the MFP with the option of creating an Article specific option.

That would be awesome if that option came out in the next release, but is there a way in the meantime?
