## [Answered] How can i download the templates?

Posted by Fiona Thomson - 2007/10/11 00:48

---

I have just paid for 6 months membership and for the life of me can't find anything which lets me register my domain so I can see the template club downloads... I followed the link TP Domain Registration from my user panel but I couldn't see anything on the page which would let me register.... please could you advise?

Hey Fiona,

You just need to log in at the top right corner and then click on the download tab right at the top.

Hi,

If you have an membership with us just download the templates click on Download and after Template Club - Member Only ([http://www.templateplazza.com/component/option,com\\_remository/Itemid,67/func,select/id,6/](http://www.templateplazza.com/component/option,com_remository/Itemid,67/func,select/id,6/)) and off corse let us know the domain where you use it...

Regards,

Ah, all fine now.

For some strange reason when I logged in at first the template club - members only area link didn't let me in to the club templates and the domain registration page didn't show up either but it is now.

Thanks very much :cheer:

Fiona,

You're Welcome...

Any help just post it!

Regards,

Hi,  
I just downloaded a template. How do I let you know on which Domain I'll be using it? Where is that panel? I logged on, went to the download tab but do not see the "Domain Panel".  
Also, I own multiple domains. I have one just for testing/ "staging". When I feel that the software is ready, that's when I migrate it to the "prod" domain. Am I allowed to use a "staging" website? I have no problem switching from "stage" to "prod" as I do this like flipping a switch. I do it without doing any file transfers. Please advise. BTW, I am happy with the templates! Awesome job.

hello rich,  
you can submit your domain here ;)

Thanks for the link. I also found it in HOME PAGE>USER MENU>TP DOMAIN REGISTRATION, on the right side navigation. For some reason I was looking for it in the download section. :P
