## Can i use jootabs to display links with images

Posted by abdul - 2008/05/27 20:58

---

hi Ronsyz

first of all congratualtions for redesigning the main page, it looks very hot  
wish you guys had designed similar drop-down menus for the templates

i also liked the icons that gets bigger when the mouse is placed over, woooooow

i want to use the jootabs to display links with image  
specially, i want to use to refer specific links such as radio/video with urls  
on the new design, you guys have 2 cloned jootabs which displays latest forums and latest items.  
so how do i place articles with url under jootab?  
also, how do i change the colour of the tabs

many thanks  
abdul

Hello Abdul

on the new design, you guys have 2 cloned jootabs which displays latest forums and latest items.  
so how do i place articles with url under jootab?  
also, how do i change the colour of the tabs

You able do like that, you could be use any modules and publish at the JooTabs  
What about if you try to read the Installation Guide about that?

Regards  
Rony

Hello Sourpuss,  
I'm sorry, i have try to find that again, but until now, still not find that. i ever find that. what about if you contact Richardo,  
he is JooTabs developer
