
duplicate xtypo

Posted by boremy03 - 2008/06/10 04:48

Good morning,

I xtypo for joomla 1.5 and especially the parameter xtypo rounded corner.

Is it possible to duplicate the plugin to have more opportunity with the same color corner?

how? thank you for your reply and very beautiful day.

Rémy

Hello boremy03,

You don't need duplicate this plugins

just use this like plugins information that you can read from your plugin manager

Regards

Rony

hello ROny

thank you for your answer, so fast.

I have read the documentation of plugins, but I wanted to keep the same color corner (white rounded2), but with background of different colors. for example an ivory and gray in the same article. And I do not see how, since the setting does not keep a single color.

Good day

Rémy

Hello boremy03,

If like that, you need insert or copy and edit much code from plugin php files.

Regards

Rony
