## Banner

Posted by Jimmy - 2008/06/12 13:07

---

I installed and love the component, however The banner i am running also shows on the bottom right corner of my front page. Is there a suggestion on how to fix this issue. As I said I love it, and really want to use it, but programming is not my greatest conquest in life. :S

jimmy,  
do you have any live url?

hello jimmy, I checked your site and found the page peel is working properly .  
what browser did you use?

---

IE 7 you did not see the big grey banner that says leroys community on th bottom of the page

Thanks

owwhh ic  
ok, from your Joomla Backend go to Extensions > Module Manager  
then unpublish the "Banners module"

---

Jimmy,

Your banner is still on your system.

To showing specific banner for your banners module, simple choose the Category field from the banners module backend parameter

=====

I do appreciate your help, but that banner was listed as an advertisement and turning that off turned the module off, I am sure I simply don't understand, any more advice!

Thankyou very much

Jimmy
