## Joo Tabs Breaks My Menu

Posted by April Hawk - 2008/06/08 12:05

---

When I install Joo Tabs it breaks my Left Side Menu, I tried changing the styles but its not that simple. Any ideas on how and where I should look to fix?

Hi,

Sorry for lately reply!

Can you please provide us with a live site url!  
Is too hard to catch a problem if we cant see it ;)

Thanks

™ have the same problem.. JooTabs drops down my right menu, from Tempo Poll and down. This happens with IE 6.0.2900.2180. The url is: [www.tempo.gr](http://www.tempo.gr)

Plz give me a solution as soon as possible! Thanx!

Hi,

I cant test with IE! maybe someone else can!

Regards,

This Joo tabs sucks in IE. It is not tested in ie, I think it is useless to use this mod. There are plenty of better, and more important - working stuff.

Hello someone there,

Thanks for your review...we'll buzz the developer for this issue...

i've noticed that jootabs uses class .menu. this class may be conflicting with your menus. adding a module class suffix does not work, at least not in joomla 1.5.6. the .menu class may be conflicting with other menus.

Hello undoit,  
for that depend on your template  
jootabs just implementation that from your template code

Good Luck

Simple solving for this issue is go to your mod\_jootabs.php file and find and replace all the class="menu" instances to class="mytabmenu". Save and up to the server  
Then go to the css file (depending on your style)  
and find and replace menu to:  
mytabmenu

Then everything should work fine...
