
JooTabs Trying to apply css to all my menu's

Posted by agarza - 2008/06/25 11:51

Every time I enable the jooTabs my menu's seem to do weird things, I believe whats going on is jooTabs is trying to apply css to all my menu's.

FIIXXXEED!!!! YAY

I think this fix should be applied to core jootabs module:

1. Open site->modules->mod_jootabs->tmpl->default.php and change the following code:

px;">

2. Open site->modules->mod_jootabs->jootabs->style1.css, style2.css, ... and change all instances of .menu to .joomenu

That did it for me B)

Thank you very much agarza, you fixed the problem few of us trying to fix for weeks.

Thank you again

Good work!...the module developer just didn't realize at 1st that there will be a class name conflict possibility out there...we should learn from this experience...
