## advanced css tab styling

Posted by agarza - 2008/06/30 17:23

---

I want to get my tabs to have a rounded folder tab like this:

[http://www.dynamicdrive.com/style/csslibrary/item/animated\\_horizontal\\_tabs/](http://www.dynamicdrive.com/style/csslibrary/item/animated_horizontal_tabs/)

but it seems that the way they get the right image in there is with css property "a" and these tabs don't have "a" so how do I do this?

Thanks in advance.
