
Firefox 3

Posted by Michele - 2008/06/23 15:25

As you can see in <http://www.volleyobsession.it/blog/volley-italiano.html>, pagepeel doesn't work correctly with Firefox 3 as with Fx2 and IE. The mirror is not correct. Any suggestion?

I opened your website in Firefox 3 and it looks just fine. It's strange because I tried it on my site (http://wallstorm.com/index.php?option=com_contact&view=contact&id=1&Itemid=13) and it's not working in FF3 but it's fine in IE7. Maybe same thing.

Could you check my site and see if it works? Maybe I'm just not seeing it :)
