
Xttypo - Problems viewing in IE6

Posted by Ixtlan - 2007/11/05 15:53

Hi

I am having problems with Xttypo in IE6.

I have put rounded corners into some text.

In Firefox works OK, but in IE6 the bottom border width is smaller than top.

Any ideas - would love to use this as is quite cool

i am having the same problem with the bottom being shorter than the top in ie7 when using the rounded corners. Is there no fix for this ? it would be a pity if there was not as it is an excellent piece of work.

If you wish to see what happens take a look at my website
www.computips.co.uk/joo

Im having this same issue with ie7, the xtypo_quotes dont work fine, it doesn't show the quote image, in firefox works fine, i have this issue, as far i know only with quotes, its the first time that i use it...

Any fix?

Regards,

Bruno

I have the same problems ...Firefox is good, but IE is not....Should I pursue this error or should I proceed to find another "CSS " aide?

Ron
