## Xtypo in Docman

Posted by Xtypo in Docman - 2008/07/05 21:32

---

Is there anyway to get Xtypo to show up on the top of the template for the Docman comp.? I have tried several things and I can get it to output the text, but it also outputs the xtypo code in plain text too. Really need to be able to include a xtypo\_info section at the top of all pages in Docman.

Thanks in advance.

Chris

Hello Xtypo in Docman,  
what about if you find the information about "is Docman available for other mambot systems?"  
if yes, did you enable that?

Regards  
Ronysyz
