
[On Support] Problem with \$ icon

Posted by Robert VanBurkleo - 2007/10/29 01:35

Missing numbers and text if I have a dollar sign \$ in the quote text.

{xtypo_quote} They spent \$700 billion for medical care. {/xtypo_quote}

would show as "They spent 0 billion for medical care"

Thanks for share this problem with us... Are you using the new version?

Regards!

Yes the latest version 1.2

I have not tried it again, let me know if it works for you, I may have copied in some hidden character that caused it to fail. I published my article by removing the dollar signs and spelling out 700 billion dollars.

Yes i think this symbol can cause this kind of errors...

Anyway what can i do is talk to the creator of the extension (Andy Sikumbang) in order to try to arrange a FIX to that :)

Regards,
