
The Better... Why? I Explain!

Posted by Ricardo Sousa - 2007/07/10 00:22

Its time to say what i think: B)

Why is Template Piazza better than others?

The answer to this question is a lot of thinks you should think...

Price

This is a lot of important when you bough a template off corse...

Lets see

Prices by Year:

TemplatePiazza (r) --> 60 USD

Yootheme (r) --> 50 USD

RocketTheme (r) --> 75 USD

Joomlart (r) --> 70 USD

read the next to be certain who is the best XD

Templates Released

If you pay you want to have templates. In TemplatePiazza there is 2 templates month!

Numbers by month:

TemplatePiazza (r) --> 2

Yootheme (r) --> 1

RocketTheme (r) --> 1 (some months you have gifts of a new template (normaly re-design of the main month template)

Joomlart (r) --> 2

Support

I have some years of Joomla! and before discover TemplatePiazza i have accounts with the others Joomla! Template Porvides you see before.

What can i say is that sometimes we need help and normaly we want that the people who wrote the code or have more hability with this help us... but... sometimes there is a small and frustanting response: "see the code and do the changes"??? :ohmy:

In TemplatePiazza there is a very very big help to all the customers. If you have some some question they dont tell you to solve the problem (because if you can solve the problem you dont ask... :whistle:) the~y ask you the links and the code and they solve the problem...

... and explain you how did they solve!

Compability

If you look around you can see that other Joomla! template providers have a lot of compability issues... because there use a lot of JavaScript that can affect some components.

In TemplatePiazza no! There is a good structured code that in most cases have not any compability issues.

You can trust in a cross browser and COMPONENTS site!

Design is style

All the templates provided by TemplatePiazza are very very beautifuls because there are designed by who knows what are doing...

Are templates (off corse there is some exceptions) are very beautifuls and have a lot of small inovations that put your site so most beau!

Dont forget that if you have good content but a bad design there is no chance of sucess...

All you need!

I think that what a Webmaster expect from is site is:

Content

Usability

Design

So... TemplatePiazza provide you 2 of this 3 things!

Negative Aspects

There are:

-> Some disorganization in the releases

and just this... :laugh:

Not negative but suggestion:

-> Optins like: Bigger /Smaller word size

Width

to the end user! And modern lines (you have already but we just want more when we see a perfect job like yours)

General

Ok there is my opinion and not facts like before...

I think this is surely the best Joomla! Template Provider...

They think in the customer when they are doing the templates and they clearly know that sometimes the help and support is everything...

If i have to choose a template provider i would choose TemplaPlazza for:

Cheaper

Quality

Support

I recommend: TemplatePlazza for a more healthy live :cheer:

Note: If you are thinking that they pay me to say that this is not true :P . I just say what i think and because i think you should sign up for TP! ;)

sorry for the english i did the best! :lol:

i still think joomlart and rockettheme template are better than template plazza, as they do good coding and they look 100% commercial.

As for the tp, the same design keeps repeating with only the component difference. so not impressive at all..

sorry to say this..

i considered taking a membership but again thought for a while and chose to go with joomlart and RT
