
Comuna Piazza and Page Peel

Posted by John - 2007/11/27 00:16

Hi to all!

Anyone here have installed the page peel module on comuna piazza template??

It seems that, on comuna page peel doesn't work.

Thanks!

yes sorry, but i think that because pagepeel is a freemodule, i can ask about this module also about comunaplazza template.

Help the people about pagepeel and comuna.

Thanks

Hello... I have some problems while installing modules and components with comuna quickstart. I have upload the quickstart comuna to my webserver, but for that, the components and modules must be installed, and i have tried to install them from the joomla directory, but still i get this message:

Installation file not found:

/data/members/paid/h/e/hemels-licht.com/htdocs/www/administrator/components/com_installer/component/

can this be simply working?

greatings,

from holland
