## [On Support] problem with png quotation marks

Posted by clem - 2007/12/03 07:43

---

hi.

i'm using xtypo v1.2 in joomla 1.5rc3

i've noticed the gif images used to display quotation marks don't look nice with my dark background. I created new ones as png files and selected them in the admin back-end. Unfortunately they don't appear in the front end.

Do you know what the problem might be?

clem

Thanks for a great plugin.

ps: i'm using the ja\_purity template.

i've noticed it works with 8 bit pngs... but i'd like to use pngs with proper alpha transparency if possible.

Hello clem,

could you give me more detail about your live site?  
or i hope you could be login....

Regards  
Rony
